

Startup sampeyan durung bisa didanai nganti sampeyan mbuktekake traksi, perulangan, lan dalam menyang pertumbuhan sing cepet. Iki carane bootstrap mbangun posisi tawar sadurunge nggandhakake rapat investor.

Kelayakan pendanaan mbutuhake validasi, traksi, TAM sing gedhe, perulangan, lan dalam menyang pertumbuhan kacepetan dhuwur.

Sampeyan kudu nuduhake manawa sampeyan bisa ngowahi saka 0 dadi pendapatan \$100M ing 5-7 tahun.

Modal bakal teka sawise iku - dudu sadurunge.

Bootstrap dudu kompromi.

Iki minangka cara sampeyan mbangun posisi tawar supaya investor nganggep sampeyan serius.

Your startup isn't fundable until you prove traction, repeatability, and a path to fast growth. Here is how bootstrapping builds leverage before taking investor meetings.

Fundability requires validation, traction, a large TAM, repeatability and a path to high velocity growth.

You need to show that you can go from 0 to \$100M revenue in 5-7 years.

Capital comes after that - not before.

Bootstrapping is not a compromise.

It is how you build leverage so investors take you seriously.
